

The **Frenzied** word game of the elements

# Example words

# **This examples booklet contains just a few of the more than 10,000 words that can be created from the Element Symbols of the Periodic Table.**

Some really helpful elements are:

**S** and **Es**, these two symbols can help you form many plurals eg. Li**ONS** and MoTi**Es**

**Er** and **Y** are useful in forming multiple options eg. CaT**CH** forms CaT**CHEr** and Catch**Y**

**Ca, Ba, Co, F, He, Li, Mo, O, Pa, Re, S, U, V** and **W** are the most frequently used element symbols at the start of a word.

Interestingly there are no words starting with **J, Q** or **Z** that can be formed from the Element Symbols of The Periodic Table.
